

**Better Roads.  
Better Future.**

- Travel on Arkansas' non-Interstate highways is approximately twice as dangerous as driving on Arkansas' Interstates.
- Highway accessibility is the number one factor for companies to consider when selecting new locations.
- The Arkansas Highway & Transportation Department's routine maintenance needs have exceeded available funding for almost 20 years.
- Roads in need of safety improvements and repair cost every Arkansan an average of \$1,000 a year in unnecessary vehicle expenses.
- Every dollar invested in the nation's highway system yields \$5.40 in economic benefits.

**Better Roads.  
Better Future.**
